

To whom it may concern,

I was outraged to learn of the NAB's Petition 04-160. I am an XM satellite radio subscriber. I find it ridiculous that efforts are being made to stop satellite radio from providing its subscribers with instant Traffic and weather.

Does the NAB feel so threatened by satellite radio that it now feels it not only has to stop them from Broadcasting the weather and traffic, but has to tread on the 1st amendment as well?

Myself, and the million plus people who subscribe to XM radio, pay to hear an array and diversity of programming that can not be heard anywhere else on AM or FM radio.

If the NAB really feels so threatened by XM and other satellite providers then it should seek to better itself and become more appealing to its audience, and not waste the tax payer's money's on frivolous and ludicrous petitions.

Thank you for your time.

A happy XM subscriber.
